

Hey Everyone,

This week I decided it was time to give you a little treat in the Knightwise.com media feed and introduce you to a free, online Linux magazine that is absolutely awesome. Let me introduce them.

I seldom read books or magazines, and there is a reason for that. I'm not into sports or guns or half naked ladies (well ... not in THAT way) so I seldom find something that interests me when i'm walking past the magazine shelf in the supermarket. Sometimes the glossy covers are tempting and I would like to do nothing more then pick up one of those computer related magazines and plop myself down on the couch to read. On occasions i've tried, but I never actually found a good Computer related magazine to my liking. For some apparent reason most PC related magazines are for newbies and seem to perpetually deal with things like removing malware and virusses from your computer. Most Mac related magazines only talk about expensive audio speakers to hook up to your posh mac, and most LINUX based magazines come with a live cd of the linux distro that is just .. old news.

And lets face it. In this fast moving world, by the time a magazine goes to print, its allready old news. But there HAS to be a solution right ?

Well, I've found a magazine that tailors to both my intrests (Ubuntu) AND comes out in a way that i prefer to consume it (In PDF) AND its wallet friendly ... Free !

The Full Circle magazine is a great, informative and entertaining e-magazine (does that word still exist ?) that comes out on a regular schedule and tells you all kinds of things you wanted to know (or never knew you wanted to know) about Ubuntu Linux. Rather then being put together by some stuck up editor who thinks he is the end-all - know all of knowledge, the FCM is put together by contributions from its readers. This full color, high quality magazine is, without a shadow of a doubt, one of the best put together Linux E-magazines for the Ubuntu enthusiast.

Appart from covering all kinds of topics in their 'regular' versions, they also bundle some of the "howto" articles about a certain topic (programming in Python for example) into one special "edition" of the article covering that perticular topic.

Today we showcase one of those "special topics" : Building the perfect Linux Server. This way you'll have a great howto-tutorial-reference guide when we start talking about SSH servers and stuff on the Knightcast .. AND you'll get to have a "taste" of the Full Circle Magazine.

I want to thank Ronny for giving us the permission to 're-publish' this episode and hope many of my Knightwise.com fans will find the "FCM" entertaining.

The Full Circle Magazine can be found on <http://fullcirclemagazine.org> and features montly editions. Full Circle is a free, independent, magazine dedicated to the Ubuntu family of Linux operating systems. Each month, it contains helpful how-to articles and reader submitted stories. Full Circle also features a companion podcast, the Full Circle Podcast which covers the magazine, along with other news of interest.

Enjoy.

Knightwise.
